

F-MATIC®

urinal non-para block screen

Non-para blocks, activated by use, break apart and dissolve to effectively combat bad odors, ensuring ultimate odor control. The block screens aid in urinal cleanliness while being free of carcinogenic ingredients and being acid-free, water-soluble, and 100% biodegradable. Our heavy-duty cherry-scented block releases surfactants and chelates with each flush, providing thorough cleaning and deodorizing even during busy periods. The premium design of the screen prevents debris from causing clogs, safeguarding urinal drains from damage. With each flush, it not only cleans but also descales urinals, maintaining optimal hygiene effortlessly.
