# keep your restrooms fresh and clean

deodorize unpleasant odors

## product features

The versatile design of the Non Para Rim Cage effortlessly fits onto almost any toilet bowl, secured in place by a uniquely crafted clip. As the compound inside gradually dissolves with each flush, it services up to 1,500 flushes, maintaining cleanliness without leaving any stains behind.

- Lasts for a full 30 days!
- Leaves behind a fresh, clean scent after every flush. Scented with a Cherry fragrance.
- Fits onto nearly every toilet bowl. Attach with the block facing the inside of the bowl.
- The Rim Cage's uniquely designed clip holds itself in place around nearly every toilet bowl.
- The compound inside gradually dissolves with every flush.
- Services over 1,500 flushes
- Completely stain-free!

## product instructions

The Rim Cage is there to make sure that your toilet stays clean and fresh in between cleans, with a mini-cleansing every time you flush. So if you do have a guest coming, you'll unlikely to be embarrassed by the state of your toilet.

Installation of your Rim Cage is simple, just unravel the long plastic arm, position the cage where you want it to be and allow the arm to snap back around the top of the toilet bowl. However, it is worth taking a few moments to work out the best positioning of your Rim Cage. It is important that the device is hung horizontally and that all parts are exposed to a reasonably similar flow of water when you flush. This ensures that you get the full effectiveness of all the enzymes inside cage and that some do not wear out faster than others. The very best position for a Rim Cage varies from toilet to toilet, but generally, most toilets flush more from the end of the bowl directly opposite the cistern. This is where you should hang your rim block to ensure it gets the most water passing over it and performs most effectively. Attach the Rim Cage with the block facing the inside of the bowl.

Once the Rim Cage is securely fastened, the enzymes will automatically work to deodorize unpleasant odors and leave behind a clean, fresh scent every time the toilet is flushed. Dispose after 30 days.
